Setting Your Location Preference

GPS/Location based services are not currently available but may be in the future. When this service becomes available, below is the overview of the feature.

Turning location On will allow the network to detect your position, enabling use of certain network applications. Turning location Off will conceal your location from everyone except emergency services. Even when location is turned On, no service may use your location without your expressed permission.

1. From the **Settings** (**7**) menu, select **Location** (**5**).

2. Highlight either **On** (**1**) or **Off** (**2**) and press **OK**.

Setting your Security Preferences

Your lock code is commonly the last four digits of the mobile phone number.

Changing Your Lock Code

1. From the **Settings** (**7**) menu, select **Security** (**7**).

2. Enter the current lock code.

3. Select **Change Lock** (**2**).

4. Enter a new 4-digit lock code.

5. Re-enter the new lock code.

Locking the Handset

Helps protect the phone from unauthorized use. Once the phone is locked, the phone is restricted from making calls until the lock code is entered. However, the phone will still receive incoming calls and make emergency calls while in the locked mode. You may store up to ten additional telephone numbers within the Security menu for use when the phone is locked.

1. From the **Security** (**7**) menu, select either **Lock** or **On Power Up** and press **OK**. The **On Power Up** function will lock the handset when the phone is power cycled.
